

Experience

Product Design Lead & UX Designer / IBM · 2021 – Present

Evolved through multiple roles at IBM, from UX Intern to UX Designer, Design Lead, and now as a Design Contributor with the Carbon Design System team. I have led design strategy from concept to implementation, collaborating with research, engineering, and product management to align with product vision and market strategy. My achievements with the Product-Led Growth team in 2024 gained recognition, paving the way for my new role in helping shaping IBM's products.

Research & UX Design Intern / IBM · 2020

Chosen as the sole intern to participate in the Patterns Design Program for onboarding new hires, where I conducted user research, facilitated Enterprise Design Thinking workshops—an area in which I have since developed significant expertise—and delivered tested and validated solutions for an IBM internal applications.

Founder & Art Director / Life Beyond Textiles · 2018 – 2019

Interviewed Mayan weavers in Guatemala to uncover a common issue: lacking the funds for their children to obtain an education. Created a charity, leveraging the UX process, which successfully raised funds to provide 13 students with one-year scholarships, uniforms, shoes, and school supplies.
